Descripción

AirClean is specialized manufacturer who design and manufactures environmental air pollution control technology. Our solutions include patented bio-technologies MónaFil®, MónaShell® and CrumRubber™ . Some of this technology can be used also for biogas depuration. In addition, Air Clean also provides complimentary Chemical/Physical technologies such as chemical scrubbers and adsorption systems. Air Clean offers also air process systems (biocells, windrows) using last patented bio drying process. Air Clean is a turnkey provider with over twenty-five years' International experience covering all aspects of design, construction, installation and final testing. Air Clean is uniquely positioned to provide best in class solutions at the lowest life cycle cost, utilizing either stand-alone solutions or multi-stage multi-technology solutions.

Activity - Industry, Engineering and Plant Construction for: Air Depollution, Biogas Depuration, Solid Waste Treatment
