

Marco Favilla

Sales & Partnerships

TG s.r.l.

<http://www.tgrivestimenti.com>

Description

Ours is an established concern run by seasoned technicians and formulators with a 30-year expertise and coming from reputable companies in the field of polyurethane elastomers and rubber. Our primary objective lies in the development and production of technical elastomer parts, such as, for example, special cylinder coatings, wheels, suction cups, seals and technical articles. These parts are often used in systems that expose them to chemical and thermal aggression as well as to considerable dynamic stress.
