## Description

Molino Pasini has been in the milling business for more than eighty years. For three generations, we've been producing flours for people demanding perfection from their flour. Combining artisan expertise with the most advanced analysis and research technologies, painstaking attention to quality is without a doubt the distinguishing trait of our production philosophy. Today, Molino Pasini strikes a perfect balance between continuity with the past and evolution into the future. While still maintaining strong ties to tradition and to the old-fashioned care with which an artisan product is crafted, we're great advocates of innovation in production processes and are committed to continuing our pursuit of research and development. Bringing the quality of the past into the future. You can find Molino Pasini products all over the globe thanks to a widespread network of exclusive hand-picked distributors. One of our company's many goals is to provide customers with the highest level of food safety, to which various international certifications - achieved with the highest possible scores - attest: BRC-IFS, UNI EN ISO 22000 2005, UNI EN ISO 22000: FSSC, HACCP, KOSHER and organic certification. In addition, an extremely modern and highly efficient analysis laboratory means continuous research and development efforts are channelled into products worthy of the foremost professionals. Our company vision, which is focused on unbeatable product quality, has culminated in the Molino Pasini Workshop: a centre where theoretical and practical training is divided into different offerings for businesses and professionals. Research, growth, sharing and innovation are keywords on which the Molino Pasini quality training solution is founded.
