Description

FOMET is one of the world-wide leaders in the field of induction melting furnaces and leading specialist in systems for automatic pouring. FOMET, thanks to its 55 years experience, are leaders in the field of planning and production of induction furnaces for the most varied applications in ferrous and non ferrous metals. Research studies and formulation of our own manufactured refractories, as well as equipping the furnaces with the most advanced control process systems, has achieved significant energy savings making FOMET installations more efficient and economical than ever. The efficiency and reliability of our furnaces is backed up by a fast and direct technical support service, able to satisfy the entire customer's maintenance demands and spare parts requirements. These services make FOMET a true PARTNER and extent peace of mind to our many clients.
