Cooperation Requested

1. Commercial Collaboration

Offer

Professional skin care products

Marzia Clinic laboratories develop premium quality cosmetic products based on two main cornerstones:
100% Made in Italy: the company has courageously decided to process the whole production cycle in-house: research and development laboratories, production, packaging, storage of raw materials, semi-finished and finished products.

Green: the formulations are realized with high concentrations of 100% natural key ingredients among which plant extracts, essential oils, flowers, plants, roots, algae and minerals. In this vision the formulations are free from parabens and preservatives, mineral oils, silicones, SLS and SLES, Propylene Glycol and alcohol.

High quality cosmetics made in Italy: not only luxury, but tradition and know-how applied at highest level.
