Description

Jewelry Producer

Sanalitro Gioielli, established in 1976, is quite well known in the niche of modern and exclusive design. Massimo, owner and designer, began cutting precious stones when he was 16. Nowadays he thinks and creates his jewelry on his own, cutting stones from the rough (also different kind of woods) and doing the parts in 18k gold in his own workshop/lapidary. The Sanalitro Jewelry collections are wearable works of art for the woman of today who wants to have that particular something so that she stands out from the rest. They are available in selected boutiques all over the world.
