Bilateral Meetings

- DIGITALBIT - Wednesday
- DIGITALBIT - Thursday

Description

Since 1971 BART has dealt with broaches and broaching, placing itself amongst the leaders in the precision mechanics sector in Italy. Every day we design and manufacture broaches, which distinguish themselves as tools of maximum precision, long lasting and reliable, always with tighter tolerance (up to 0,005). We are the only manufacturer in Europe to produce broaches in just 30 days, allowing us to meet sudden requests. Bart Srl has over 10.000 broaches in stock for spot delivery (see our catalog on the website) or for broaching of your workpiece directly in our factory.

Industrial maintenance

Offer

Broach and Broaching

The design and construction process of broaches is extremely innovative, we can manufacture several profiles such as involute, slot, keyway, fluted, grooved, square or rectangular, many of which are available in stock.

Furthermore, they can be manufactured for any type of broaching machine and can work on specific machine tools or automated CN work stations.

Broaching has always been the subcontracting service of excellence signed BART, offered to customers who require speed and extreme precision.

Cooperation Offered

- 1. Technical collaboration**
- 2. Industrial Collaboration**
- 3. Commercial Collaboration**
- 4. Clusters Partnership**
