

Pierluigi Fersini

R&D Manager

PGF BUSINESS SERVICES

<http://www.pgfb.eu>

Description

PGF aims to become an indisputable focal point for collaborative ICT research and development with a specific emphasis on Green opportunities, knowledge-sharing and consensus-building. Most of people at PGF have a story of Research in Engineering and Applied Mathematics, therefore we focus on innovative use of Mathematics and Numerical Methods within ICT and Energy Sciences. We offer leading expertise in Geometry, optimization, simulation, and visualization methods. We invite the whole ICT community to share information on technological developments that could support the strengthening of cooperation between entities of any kind. Contributions from players across the entire ICT sphere are very welcome: they are intended to reflect ongoing technological advances and capabilities within R&D/ICT communities as well as forthcoming commercial deployments.
