

## METALLURGICAL INDUSTRY: OUR FOCUS

We always worked with metallurgical companies, and we know very well the challenges that this sector has to face.

Our services are therefore based around 3 tested principles:

### Reducing machine downtime

Metallurgic industries suffer a mean of 400 hours of machine downtime every year, directly impacting not only production, but also the company's reputation and customer satisfaction.

TG s.r.l. guarantees high quality rollers and after-sale services which help reducing machine downtime. Ask about our references!

### The right material for the right machine

Choosing the right coating is fundamental in order to guarantee not only durability, but also the quality of the finished product.

After more than 35 years of experience, we can provide services tailored specifically on the need of the single companies, machines and processes, like quenching, tin coating, passivation, painting and varnishing, cut-to-length line and many more!

### Shipping and take over

Thanks to our logistic partnership with Eurotrasporti s.r.l., TG offers a complete transport service.

Shippings and take-overs are sent within the same day of the Client's request.
